SCHEDA TECNICA COPERTURA «BARBIERI» DA MT 6 X 6 H CM 250

Dai gazebo di piccole dimensioni
(Metri 4×4 – 5×5 – 6×6 - 8×8 – 10×10),
fino alle grandi strutture composte o ad arcata unica,
senza alcun ingombro interno,
a partire da 15, 20, 25 metri, con passo costante di 5 metri.

Le tensostatiche, di qualsiasi dimensione,
sono modulari tra loro e secondo le esigenze
possono essere composte con forme geometriche
adattabili allo spazio a disposizione.

Con profilati in alluminio o in acciaio verniciato bianco,
complete di teli di copertura e laterali in poliestere spalmato
bianco su ambo i lati, o trasparenti tipo cristal.

Necessitano di ancoraggi al suolo
che possono essere di profondità
(Picchetti) o di superficie (Plinti).

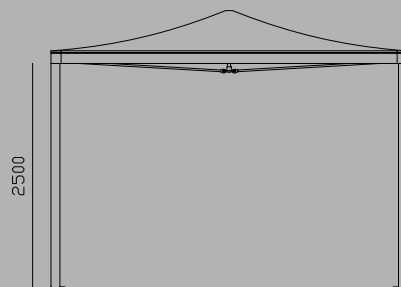

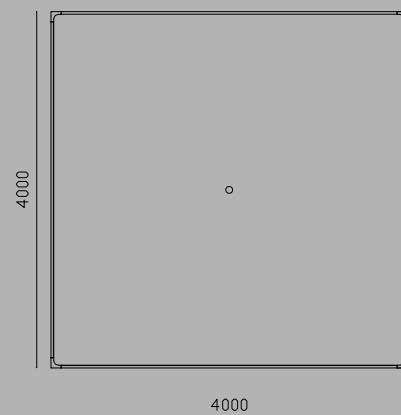

Possono essere completate da pavimentazioni in legno,
da impianti di illuminazione di vario tipo
e a seconda della stagione,
condizionate o riscaldate
con appositi generatori
posti all'esterno delle strutture stesse.
